Summary

QA with a strong frontend development background and hands-on experience with React.js, Next.js, TypeScript, and modern UI technologies. Familiar with software testing principles, test case design, functional and regression testing, API testing, bug reporting, and Agile development practices. Able to leverage frontend knowledge to understand application behavior, identify UI and functional issues, and collaborate effectively with developers. Eager to build a career in Quality Assurance while applying existing frontend development expertise.

EXPERIENCE

React Developer Trainee, Remote — Kathmandu, Nepal

Dokomandu Nepal Pvt. Ltd. — *May 2026 – Present*

- Developed responsive user interfaces using React.js, Next.js, TypeScript, and Tailwind CSS under the guidance of senior developers.
- Built reusable UI components and integrated REST APIs to implement dynamic frontend features.
- Worked with React Query, Axios, and Zustand for efficient data fetching, state management, and improved user experience.
- Translated Figma designs into pixel-perfect, mobile-first interfaces using modern frontend development practices.
- Collaborated in Agile Scrum meetings, participated in code reviews, fixed bugs, and continuously improved code quality and frontend development skills.

Frontend Developer Intern, On-Site — Shankhamul, Lalitpur

Online Notes Nepal Pvt. Ltd. — *Oct 2025 – Jan 2026*

- Built modern React applications using functional components, hooks, and Context API.
- Implemented form handling and validation with React Hook Form and Zod.
- Managed API data fetching and state using React Query.
- Designed responsive and accessible UI using Shadcn/UI and Tailwind CSS.

PROJECTS

Personal Portfolio (React and Tailwind)
I developed a personal portfolio website to showcase my skills and projects, using Flexbox and Grid for a fully responsive layout. I built reusable sections like Navbar, About, Projects, and Contact.

Project Management System (React (components, props, state), CSS, LocalStorage)
I built a simple project manager app with features to add, edit, and mark tasks as completed. It was developed using React functional components and useState for state management. I implemented LocalStorage for data persistence and designed a clean, responsive interface using basic CSS.

Mini Mart (React, Typescript, Shadcn, Context API)
I built a shopping cart application that fetches products from Fakestore API, allows users to add and remove items from the cart, manages global state using Context API, and displays real-time cart totals with a Tailwindstyled responsive UI.

Task Tracker (React, Typescript, Shadcn, Mock API, React Query)
I created a responsive task management application using a Mock API to store tasks, supporting full CRUD operations along with search, sorting, and pagination features for efficient task handling.

SKILLS

QA and Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, UI testing, Responsive Testing, Cross-Browser Testing, Test Case Design, Bug Reporting, SDLC, STLC, Postman API Testing

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Shadcn UI, React Hook Form, Yup, Zod, Zustand, Context API, Axios, React Query, Framer Motion

Tools and Practices: Git, HTML, CSS, Figma, Canva, Agile/Scrum, Chrome DevTools, Jira

EDUCATION

Himalaya Darshan College, Tribhuvan University — 2078 – 2082

Bachelors of Science in Computer Science and Information Technology — *Biratnagar, Nepal*
